

40 Square Cooperative Solutions

40 Square Personal Care Service

40 Square customer service goes above and beyond an average call center. We utilize a health care business intelligence platform with cost transparency tools and care navigators who can help members save money and better understand their health plan. So what does this mean for 40 Square's health plan participants?

We understand that health care can be a confusing maze. Even when you try to be proactive you might not know how much procedures are going to cost or which providers are the most cost-effective. That's where calling 40 Square customer service at 1-877-394-9737 can help!

Our customer service representatives have access to health care provider pricing data for Minnesota and surrounding areas, giving 40 Square's health plan participants the freedom to choose their physician or facility based on price or quality of care. In addition, the friendly customer services representatives will also review your medical bills to make sure your claims were filed and paid appropriately. Their primary goal is to educate 40 Square's health plan participants on how to navigate the health care system, find the best value and determine the financial impact of their health care decisions.

Contact 40 Square Customer Service today to learn more about our services or get the best price quote for a medical procedure!
